

- PostgreSQL

- Generales

Versiones --> Actual 2026 es la version 18

Licencias --> Free

- Arquitectura

Los WALs files son los Log de SQL server. Es decir son los .trn de SQL

- Background Processes

BackGround Processes	
process	Description
logger	Write the error message to the log file.
checkpointer	When a checkpoint occurs, the dirty buffer is written to the file.
writer	Periodically writes the dirty buffer to a file.
wal writer	Write the WAL buffer to the WAL file.
Autovacuum launcher	Fork autovacuum worker when autovacuum is enabled. It is the responsibility of the autovacuum daemon to carry vacuum operations on bloated tables on demand
archiver	When in Archive.log mode, copy the WAL file to the specified directory.
stats collector	DBMS usage statistics such as session execution information (pg_stat_activity) and table usage statistical information (pg_stat_all_tables) are collected.
